Fabrizio BARDELLI

CNR-Nanotec (Roma)

The mineral form of iron in the asbestos bodies

Fabrizio Bardelli works at the Institute of Nanotechnology (CNR-Nanotec) of the Italian National Research Council (CNR). He deals with Environmental Pollution, Medical Geology, and Materials Science and he has expertise in synchrotron radiation based spectroscopic, imaging, and diffraction techniques. He is currently involved in a project aimed to reveal composition and formation mechanism of asbestos bodies in human lungs.

Università degli Studi di Torino
